Skills

- **Programming:** C, Python, Java
- **Frontend:** HTML, CSS, Bootstrap
- **Backend:** Python
- **Database:** MySQL
- **Core:** Data Science, Problem Solving, Object-Oriented Programming

Projects

LumiSense – Smart Adaptive Street Lighting System
Arduino, PIR Sensor, LDR, LED

- Developed a smart street lighting system that automatically adjusts light intensity based on **motion and ambient light**.
- Integrated **Arduino Uno, PIR and LDR sensors** to automate street-light brightness and reduce unnecessary electricity consumption.
- Improved energy efficiency and road safety through adaptive lighting control.

Experiences

Student / Academic Projects
Adhichunchanagiri Institute of Technology 2025–Present

- Applied **C, Python, Java, HTML and CSS** concepts through academic assignments and programming practice.
- Worked on hands-on projects involving **Arduino, sensors and automation**.

Achievements

- Maintained an academic **CGPA of 8.6** in B.E. Computer Science and Engineering (Data Science).
- Completed hands-on academic work in **programming, web development and data science fundamentals**.
